

Edit Module Information Page

Step 1: Select the module you would wish to make additions to:

The screenshot shows a user interface for editing module information. On the left is a sidebar with the user's profile (Andile Ngwenya) and navigation links: Dashboard, Edit Module Information, Recent Announcements, and Edit Personal Information. A red 'Log Out' button is at the bottom of the sidebar. The main area is titled 'Courses' and displays three buttons for selecting a module: COS314, COS344, and COS301. A red question mark icon is in the bottom right corner.

Step 2: Click on the update of choice (posting an important reminder, due assignment, or adding/deleting lecture venues) and a dropdown menu will appear, fill in the valid information and make a post for subscribed students to receive.

The screenshot shows the same user interface as before, but now the 'COS314' button is selected. A dropdown menu is open, showing three options: 'Post reminder', 'Post due assignment', and 'Update lecture venue'. The 'Post reminder' option is currently selected, and a form is displayed for creating a reminder. The form has fields for 'Title:', 'Body:', and 'Date:' (with a date picker showing 'dd - - - yyyy'). A red 'Post' button is at the bottom of the form. The sidebar and navigation links remain the same. A red question mark icon is in the bottom right corner.

To add a Lecture or test venue, type in the building name in the “Venue” field and suggested locations for the venue from google API will appear. The lecturer can confirm that the coordinates on the map are correct and add the venue to the module.
