

## Timetable generation

After successful login, the user will be taken to the timetable page, which will be empty until they add modules and activities to the timetable. They can do so by taking the following steps:

Step 1: In the edit timetable page (selected on the bottom nav bar), the user can search for the module that they wish to add to the timetable.

By selecting the module of choice, it will be listed in the students list of modules which is displayed in the edit timetable page from now on, as shown below.

Step 2: By tapping on the modules plus icon, the student will be presented with menus of the module's activities (which comprises of lectures, tutorials and practicals). They may also tap the delete icon to remove the module from their timetable (and edit timetable page).

Step3: Select your desired timeslot for each activity (any clash will be highlighted to help the user make the right timeslot choices) and save your changes for them to be added to the timetable.

Here is an example of what a students populated timetable page will look like for the day, showing their activities with information such as subject, time and venue. They can also swipe down to see a calendar view to select dates and see their activities for days further in future.

By clicking the download button in the top right corner of this page, the user can download a pdf version of their timetable for offline viewing, as shown in the picture on the right.

## Navigation

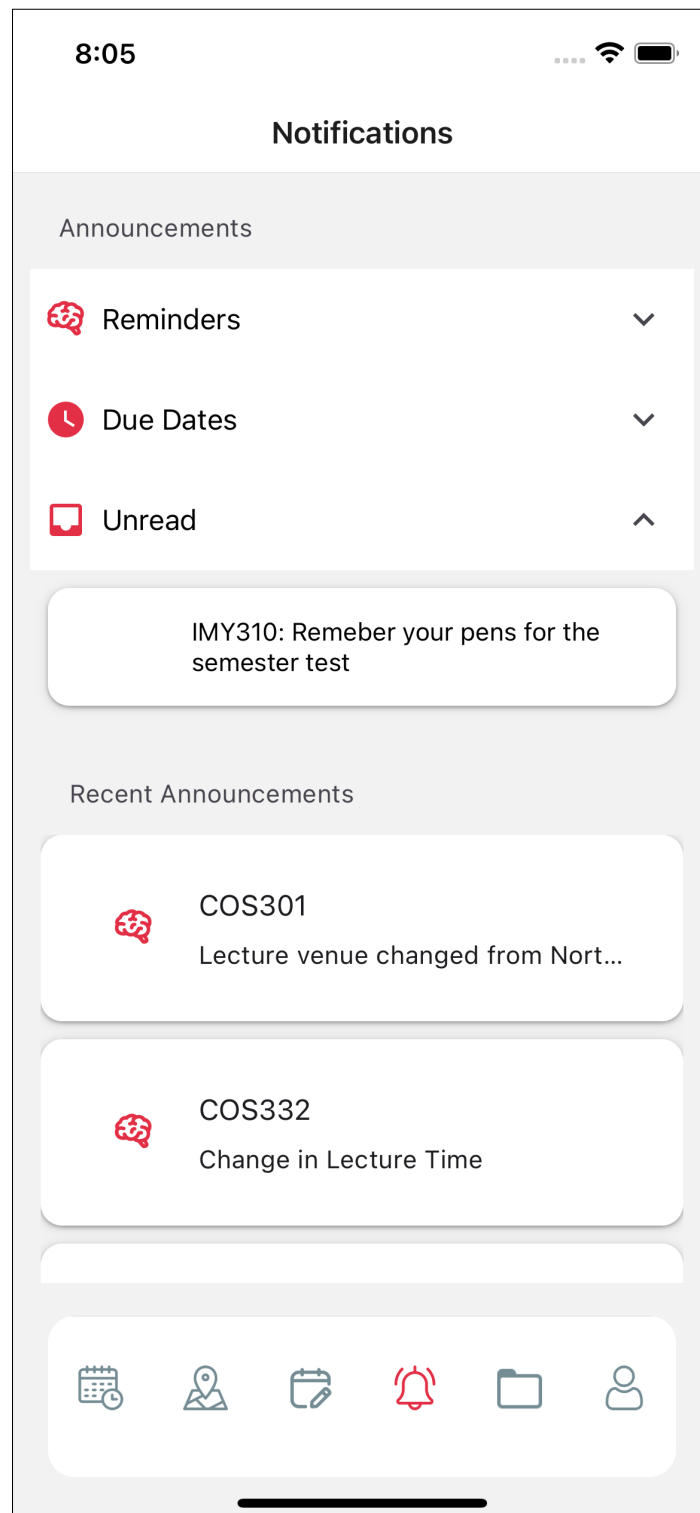

A student can tap on an activity (from the timetable page shown above) to automatically be taken onto the navigation screen and be directed to the venue posted for that activity. They can also go to the navigation page manually using the navbar, and select a venue from the dropdown, to choose directions to any of the venues posted for their modules.

By clicking “get directions” the user will be shown the route on the map along with the list of step-by-step directions. The user has the options to “hide directions” which will close this list, and should they wish to see them again they can click the “show directions” button in the bottom right corner.

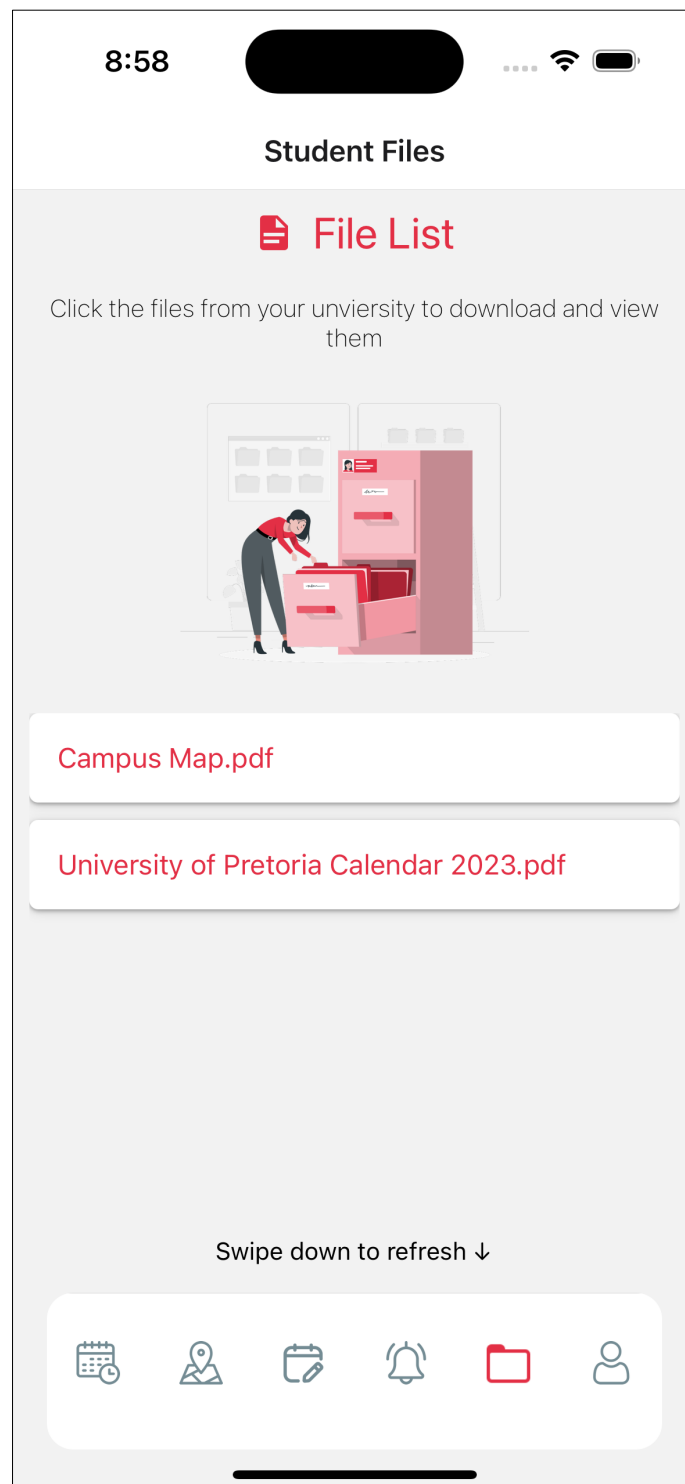

## Notifications

A student can navigate to their notifications page to see recent announcements from lecturers of their prescribed modules, which includes important reminders, due dates, and important test information.

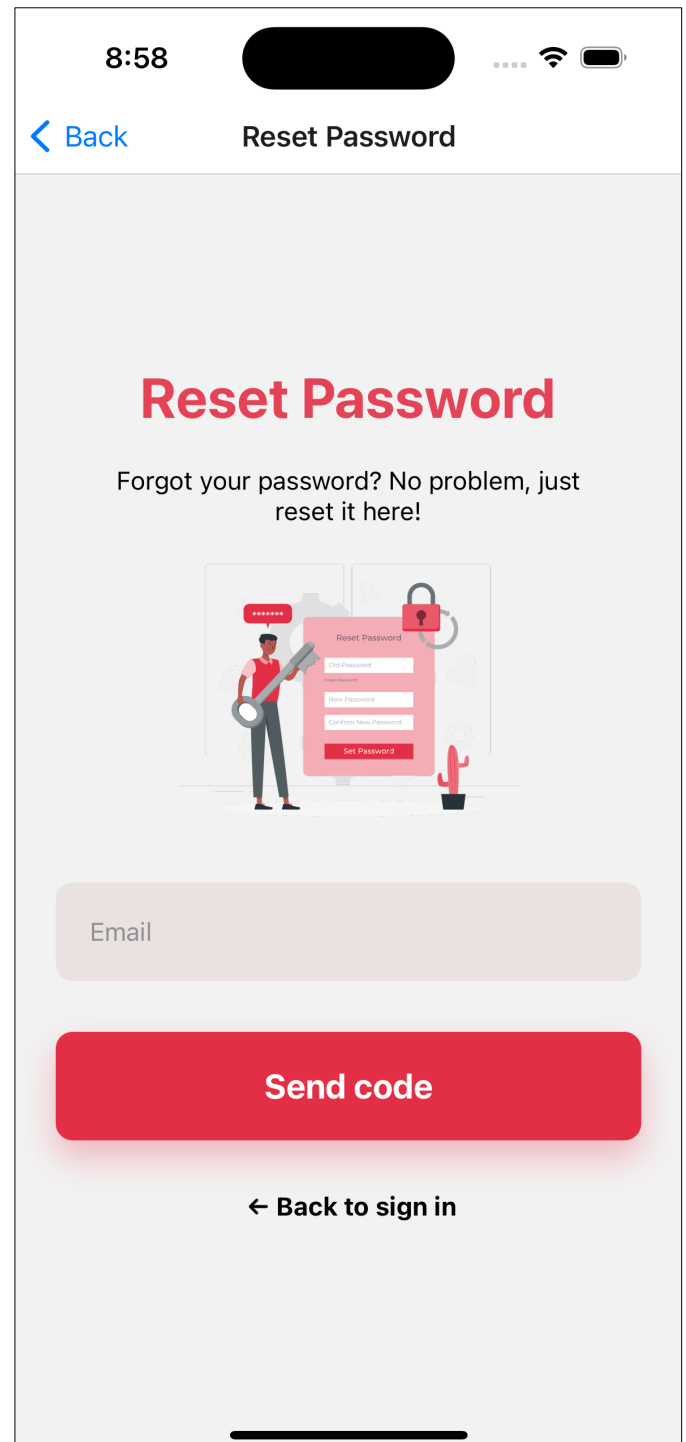

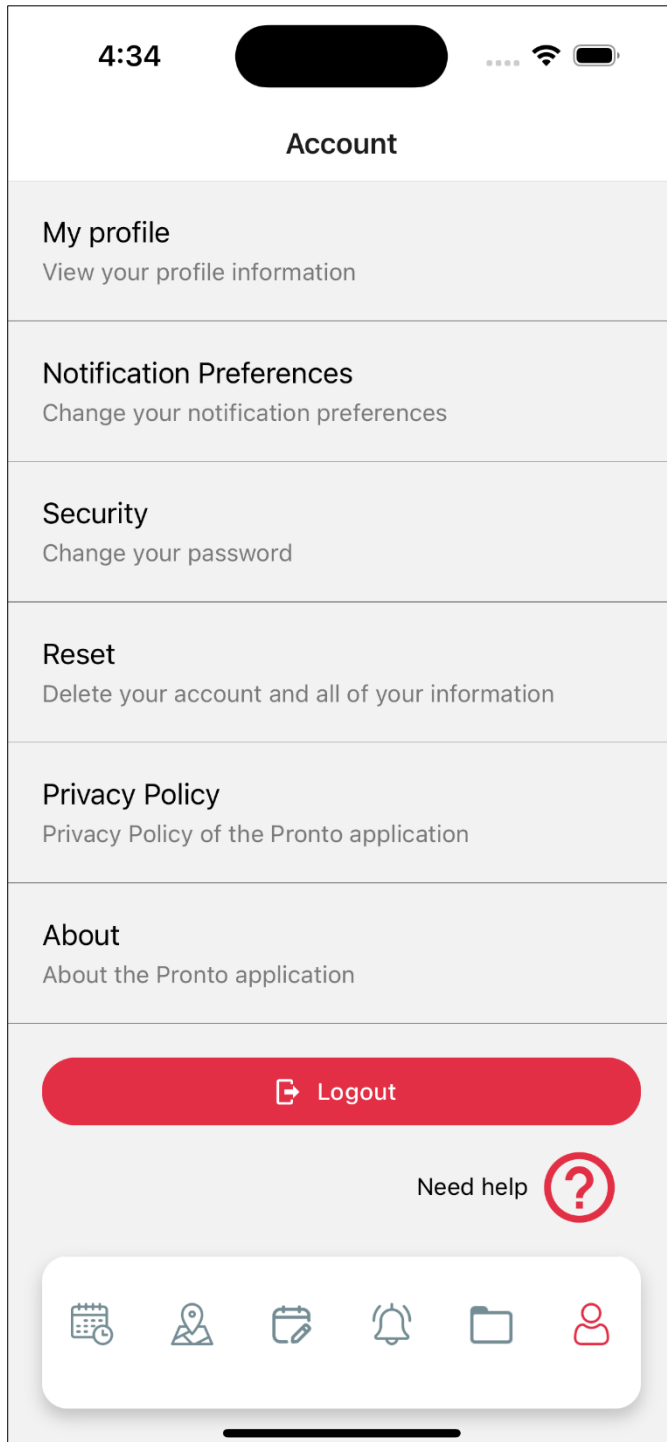

## View Institution Files

The student can navigate to the student files page, where they will be shown all the important files that have been uploaded by an institution, regarding important information such as campus maps and yearly calendars. The student can select whichever file they want which will take them to the browser, where the file can be downloaded.

## Account page

A student can view and make important decisions about their account, such as changing their password, reset (delete account), edit notification preferences and more. They can also log out of their account from this page.

## Edit Notification Preferences

After selecting “Notification Preferences” in the Account page, the user can select their preferred method of notification receipt (in this screenshot, SMS has been selected), and save the option, as shown below.
